

Design Features

ISO 5211 Mounting Pad for easy automation

Multi-sealing structure provide tight sealing and long life cycle. ISO 15848-1 low emission test certified packing available upon request.

Anti-Static Devices

Blow-out proof stem

Spring Loaded Seat & Body Gaskets structure secure reliable sealing at low line pressure

Drain design for easy cleaning on pipeline

Fire Safe Design. When soft seals are burned, springs press the seats to the ball to perform a tight seal and to prevent fire expansion.

Seat Sealant System Injection

Grafoil Spiral Wound with SS 316 gaskets and stainless steel filled PTFE Seal Ring can apply to higher temperature range

6" ~ 8"
(Standard)

10" ~ 24"
(Standard)

6" ~ 8"
(Optional, Firesafe type)

10" ~ 24"

Split-Body Trunnion Mounted Ball Valves
